

COURSES

SAFe® for Architects

Architecting for continuous value flow with SAFe®

Enable continuous value flow by aligning technical strategy with business goals, communicating that strategy to development teams, and applying Agile architecture practices.

Attendees can improve collaboration and alignment in a SAFe Lean-Agile enterprise when they become a SAFe® Architect. The SAFe® for Architects course prepares System, Solution, and Enterprise Architects to engage across the organization as effective leaders and change agents who collaboratively deliver architectural solutions. During this three-day course, attendees will explore the roles, responsibilities, and mindset of Agile Architects, and appreciate how to align architecture with business value and drive continuous flow to large systems of systems while supporting SAFe execution.

With SAFe® Architect (ARCH) 6.0 certification

SAFe® for Architects

With SAFe® Architect (ARCH) 6.0 certification

Who will benefit?

- System, Solution, and Enterprise architects
- Architects in supporting technical disciplines
- Experienced software developers
- Technical managers making architectural decisions
- Product leaders collaborating with architects

What you get

Class registration includes:

- Attendee workbooks
- Eligibility to take the SAFe® Architect 6.0 (ARCH) certification exam
- One-year membership to SAFe Studio
- Course certificate of completion

What you'll learn

To perform the role of a SAFe® Architect, you should be able to:

- Architect using SAFe principles
- Align architecture with business value
- Develop and communicate architecture vision and intent
- Plan architectural runway to enable delivery success
- Architect for continuous delivery and Release on Demand
- Lead and coach architects and team members during PI Planning and execution
- Provide leadership during a Lean-Agile transformation

SAFe® for Architects helps architects of all levels and disciplines support and enable continuous value flow in the Lean Enterprise. Through this highly interactive, scenario-based learning experience, you'll explore your role in SAFe, identify key partners, customers, and collaborators in the organization, practice making architectural decisions based on economic trade-offs, and experience guiding architectural concepts through the entire value stream using Lean-Agile techniques.

SAFe® for Architects gave me the practical understanding and tools to not only effectively lead throughout a SAFe engagement but to align architecture with business value.”

— **Jeremy Trevatt**, Transformation Leader/SPC, *BrightEdge Partners*

Prerequisites

Those who attend this course should be familiar with Agile principles and practices and must have attended at least one SAFe course prior to attending this one.

Topics covered

- Exemplifying Lean-Agile architecture
- Architecting for DevOps and Release on Demand
- Aligning architecture with business value
- Developing Solution Vision, Solution Intent, and Roadmaps
- Preparing architecture for PI Planning
- Coordinating architecture throughout PI Planning
- Supporting Continuous Delivery during PI execution
- Supporting new Strategic Themes and Value Streams
- Leading as an architect during a Lean-Agile transformation

Professional Development Units (PDUs) and Scrum Education Units (SEUs)

- Attendees may be eligible to apply for 24 PDUs toward their continuing education requirements with the Project Management Institute (PMI) for PMP, PgMP, and PMI-ACP certifications
- Attendees may be eligible to apply for SEUs under category C, toward earning or renewing their CSP through Scrum Alliance
